

## ICSS in Spain

ICSS Spain was established in March 2002 to ease the introduction of Spanish and Portuguese carriers and ISPs to the European market. Our aim has been to bring everyone closer to information technology by offering international managed or convergent solutions to our customers.

For this reason, we brought the international network of Deutsche Telekom to Madrid and Lisbon. With 18,000 km of fiber optic cables, it is one of the most extensive and developed networks worldwide. In doing so, we have been able to provide comprehensive Voice, IP, and Transport solutions.

ICSS owns a national license to operate in the telecommunication market in Spain and Portugal. Its local network structure has 5 PoPs, Carrier Houses 1 and 2, Interxion in Madrid, a Carrier House in Barcelona, and a Carrier House in Lisbon. Our Spanish team handles all relations with the Telefónica global account, Portugal Telecom, and business in Andorra, and Gibraltar.
