

GSMA Roamfest & Hubfest

Oct 15, 2009

October 15, 2009 in Copenhagen, Denmark

Roamfest & Hubfest is a GSMA member's only event and is open to Full Operator or Rapporteur Members only. Associate and other operator members have the opportunity to exhibit at the event.

Roamfest provides a platform to enable GSMA Operator Members to meet, discuss and reach bilateral agreements for GSM, GPRS, WLAN, SMS and MMS interworking and 3GSM roaming. It helps operators to overcome language and communication barriers by meeting colleagues face-to-face to fast-track roaming agreements. Operators can save valuable time and effort by negotiating and signing multiple agreements during a concentrated one-day event.

Hubfest is co-located with Roamfest, and is an opportunity for hub providers to meet with operators from all over the world during a single day. Hub providers can arrange meetings to present their Roaming Hubbing solution and begin agreement negotiations.

ICSS activities

Deutsche Telekom ICSS is an Exhibitor.
