

Global voice trader of first choice

You expect a maximum of voice quality at affordable costs
You want to select the voice quality that fits best to carry your traffic to a specific destination. In addition to this, you expect to make real-time decisions and rely on transparent market-driven pricing and seamless QoS.

ICSS responds to all your international voice requirements

- We are continuously enhancing our global voice trading processes to enable efficient data exchanges and a faster reaction to the new market dynamics.
- Our traders are working in a highly automated IT environment to improve your buying capabilities, minimize your termination costs, and maximize your network performance.
- ICSS and Ascom have been awarded in the “Wholesale Service Innovation” category for their GATE (Global Access Telekom Environment) solution. This solution provides a holistic view of the voice trading business and supports ICSS in the efficient management of port orders, contracts, carriers, resources and service data.
- You can choose from three different quality categories for your international voice termination.
- We offer worldwide coverage that eliminates your need to negotiate with many players
- We have the capability to develop and implement international voice [outsourcing solutions](#)
- Driving forward the use of flexible IP-based platforms that provide OoS capabilities for all type of applications, ICSS is preparing its business for your future voice requirements.
